附录

rs_driver_update基于rs_driver进行了小部分修改，修改点如下：

rs_driver修改点

1. rs_driver/driver/driver_param.hpp

```
inline InputType strToInputType(const std::string& type)
{
    static const std::unordered_map<std::string, InputType> strInputTypeMap = {
        {"ONLINE_LIDAR", InputType::ONLINE_LIDAR},
        {"PCAP_FILE", InputType::PCAP_FILE},
        {"RAW_PACKET", InputType::RAW_PACKET}
    };

    auto it = strInputTypeMap.find(type);
    if (it != strInputTypeMap.end()) {
        return it->second;
    } else {
        RS_ERROR << "Wrong input type: " << type << RS_END;
        RS_ERROR << "Please give correct type: ONLINE_LIDAR, PCAP_FILE, RAW_PACKET." << RS_
        exit(-1);
    }
}
```

```
struct DeviceInfo{
    void print(){
        RS_INFO << "-----" << RS_END;
        RS_INFO << "                RoboSense Device Info " << RS_END;
        RS_INFOL << "state: " << state << RS_END;
        RS_INFOL << "sn: " << sn << RS_END;
        RS_INFOL << "mac: " << mac << RS_END;

        RS_INFOL << "top_ver: " << top_ver << RS_END;
        RS_INFOL << "bottom_ver: " << bottom_ver << RS_END;
        RS_INFOL << "-----" << RS_END;
    }
}
```

```
struct DeviceStatus{
    void print(){
        RS_INFO << "-----" << RS_END;
        RS_INFO << "          RoboSense Device Status " << RS_END;
        RS_INFOL << "state: " << state << RS_END;
        RS_INFOL << "voltage: " << voltage << RS_END;
        RS_INFO << "-----" << RS_END;
    };
}
```
